

Six Guidelines About Artificial Intelligence.

STAY SMART ONLINE

1

Keep private info safe. Think twice before you share online.

PEOPLE POWER

2

AI is just a tool - it's not human. Need help? Talk to a trusted adult.

THINK, THEN CLICK

3

AI can help, but don't rely on it alone. Always think and check before you click.

CHECK FOR BIAS

4

AI might miss important perspectives. Ask yourself: Who else should we hear from? What other views matter?

CHOOSE WISELY

5

Choose the right AI tool for your task. Start with teacher-recommended tools and go from there. Stay safe and age-appropriate.

MAKE IT YOURS

6

Use AI to start ideas, then add your own. Always give credit where it's due.
